PARKER SHAW

As one of the countries longest established and most respected IT recruitment businesses, we find and place specialist talent throughout the industry.

Our Background

Parker Shaw has established a partnership with a group of specialist companies to provide an integrated approach to data management – embracing cyber security, information level governance, legal services and storage analysis at scale. The application of these services in a controlled, project-led manner, supported by experienced resource, enables the creation of a solid foundation from which your organisation can drive compliance & regulatory requirements, security and data led initiatives

All of our partners are highly experienced in their respective areas and Parker Shaw can put together whatever services are required in a modular manner, ensuring that you only need to take the services you need to ensure a successful outcome.

Our Partners and Services

Data MetaMorph

DMM deliver professional services leveraging their purpose-built analytics software to enable more effective data related business, compliance or infrastructure programmes. They conduct in-depth analysis of metadata to establish insight that gives you the level of confidence and evidence to follow through on our findings. This is how they enable you to reduce your volumes, costs and risks, whilst having a better understanding and control of your valuable data.

- **Unstructured Data Assessment**: Analysis of unstructured data to establish detailed Optimisation opportunities, and identify personal data and other concerns related to data Compliance
- **Find Your Data Assets**: Analysis of key business and technology information to create a more complete and accurate Data Asset Inventory of devices holding your data

ICA Consultancy

Through experienced resources they provide advisory and consultancy services, and Virtual CISO engagements to organisations helping them identify, manage and mitigate risks relating to information and cyber security. Their three service lines provide pragmatic and sustainable solutions, enabling clients to improve and maintain their maturity whilst maximising the benefits from their investments.

- **Assess**: services designed to provide an organisation with a view of their maturity, identifying risks and pragmatic, prioritised recommendations.
- **Assist**: services designed to support organisations define or implement strategy, engage with their board members and manage day-to-day operations.
- **Advise**: services designed to help organisations maintain their security posture, such as delivering training and awareness or supporting vendor selection.

Information Squared

Utilising their experienced Information Governance professionals, Information Squared rapidly assess current policies, processes and technology against GDPR requirements. Focussing on the areas of highest risk, they deliver inventories, more complex policy and process uplifts and provide customised strategies to remediate and manage unstructured data.

Hybrid Legal

Hybrid Legal's expertise is provided by their team who possess a deep understanding of the way business works and the value they can add to your bottom line. They provide proactive legal services and guidance to help you achieve compliance, ensuring that you have the necessary policies, processes and training in place to meet Data Protection legislation requirements.
